LASER GEL

Conductive gel specific for laser treatment

A soft emollient conductor gel enriched with precious rose water distillate, with toning and soothing properties, specific for LASER treatments thanks to the formula that guarantees the absolute transparency of the gel, a fundamental characteristic for letting the laser light through.

MAIN ACTIVE INGREDIENTS

Rose water distillate (*Rosa gallica extract*) - The most ancient beneficial effect of rose water, its refreshing action, dates back to 1350 d.C. Prepared with petals and seeds, it was often used to lower fever, reduce inflammation and remove excess heat from the body. In cosmetics, rose water distillate is used in cosmetic products to treat all skin types, because it calms irritations, hydrates and repairs.

Professional use

ISO.LASER.100

4500ml • Net Wt. 152.16 oz.

SUPPORTING PRODUCTS

Cleansing Soft Mousse
Jojoba Face & Body Scrub
Laser Repair Lotion

Professional use

ISO.FOAM.150
[150 ml]

Professional use

ISO.SCRUB.200
[250 ml]

Professional use

ISO.LASER.200
[250 ml]

TECHNOLOGIES TO USE IN COMBINATION

Laser 808nm

USE

In cabin - apply a generous layer of Laser Gel on the area being treated. Do not reuse the gel once it has been exposed to the Laser energy.

Ingredients: Aqua, Rosa gallica extract, Carbomer, Phenoxyethanol, Imidazolidinyl urea.

LASER REPAIR LOTION

Hydrating, soothing and repairing serum

Emulsion containing Betaglukane, which stimulates natural skin protection processes, Allantoin with a repairing action and Vitamin E with antioxidant properties. It also contains other active moisturising, softening and soothing ingredients, like Aloe and Calendula mucilage.

MAIN ACTIVE INGREDIENTS

Acetyl Tetrapeptide-15 - Reduces nerve response to external stimuli. It increases the skin tolerance threshold. It provides a calming action, reducing the skin's hyperactivity to external factors.

Betaglukan - This stimulates the cells in the immune system and in the skin's natural defence processes. It provides a hydrating action.

Allantoin - It performs a hydrating and soothing action. It stimulates natural tissue repair processes leaving the skin soft, elastic and smooth, protecting it from external aggressions.

Calendula Mucilage (*Calendula officinalis flower extract*) - It offers an anti-inflammatory, soothing, hydrating and nourishing action.

Vitamin E (*Tocopherol*) - Provides an intensive anti-oxidant action, protecting the skin against ageing due to the formation of free radicals.

Aloe (*Aloe barbadensis extract*) Rich in vitamins, it has a hydrating, regenerating, soothing effect.

Professional use

ISO.LASER.200

250ml • Net Wt. 8.45 fl. oz.
